### 3 Habits of Intentional Leaders

*Great for inspiring leaders*

We keep hearing this word a lot ... *intentional, intentional*. Right, but what does that really mean? Being intentional means setting a **success framework** that packs a serious punch in terms of keeping you and your **team motivated and structured**. Seems straightforward enough, but the problem is, most of us continually fall short in that mission.

In this engaging and passionate presentation, Dan speaks directly to **leaders** – from the wily veteran to the new leaders struggling to find their way – who are looking to sharpen their talents and learn new and practical tips to be more intentional. A few of the relatable insights you'll hear include how to **keep distractions from taking center stage**, how to recognize when the **same way of doing things doesn't cut it** anymore, and the need to establish a new standard of SMART goals called the **SMARTEST** goals.

Dan's mission is to challenge you and your team to be intentional about **taking ownership** of your **success**, creating a roadmap that allows for **consistent growth performance**.

### Change the Cycle

*Great for leaders and team members who know they have the ability to be great but feel stuck in neutral*

In this real-life and emotional journey, Dan gives participants a never-before-seen peek behind the curtain as he unpacks his own personal and career struggles early in life and shares how he **transformed** from being unmotivated and average to a **disciplined, dedicated, and determined** leader.

Believe it or not, Dan's wild ride includes going from being a gas station employee and pest control bug-killing agent to **Campus President** for a Higher Education Institution and then **Chief Operations Officer** for a 100% remote cybersecurity audit firm. None of this happened by accident. For Dan, it took recognizing that he was destined for bigger things, and it was time to stop holding himself back with inaction.

We all have **greatness** inside of us that simply needs that extra push. Come along for the ride and be **inspired**.

## Workshops

### Yeah, Yeah ... I Know I Need Goals

The term "SMART goals" is now a common language for anyone in corporate America. But 30 years have passed! Isn't it high time to rip that BandAid off and look to an **expansive** and **permanent** version, one that meshes with our ever-changing environment?

In this **practical** and **collaborative** workshop, Dan walks through each step of setting the **SMARTEST** goals. This workshop is meant to be **interactive**. Participants will come away with a goal creation plan that can be immediately implemented for **success**.

### PROPEL Yourself Each Day with Purpose

For many leaders, managers, and team members, it only takes about 30 minutes into the start of another workday before the **distractions** start pouring in. You know the drill – emails, phone calls, text messages, social media notifications, kids, etc. Dan believes that in setting fewer goals each day and being **consistent** with that shorter to-do list, we **WILL achieve** greater results.

This workshop helps participants identify practical tools that help them focus on being **successful** each day while at the same time providing **strategies** that answer the question, "How do I get it all done?!"

### Stop Waiting – Help Your Team ACHIEVE now!

The mark of a true leader is someone who is **determined** to help future leaders get to where they need to be faster. They provide **clarity** and space for their team members to **thrive** – not just sometime down the road, but **NOW**.

This workshop is ideal for **leaders** or **managers** who are working with future leaders. Dan provides a **simple** to understand and **fun** to implement system that **motivates** teams to get started with **achievement** and avoid the pitfalls of people and culture **leadership**.

### Leadership, Efficiency, and Technology Tools ... OH MY!

Do you enjoy leadership training with a splash of practical tools and success hacks? This workshop provides the learner with a **fun** overview of what it means to be an intentional leader in life while sharing **real** technology hacks and **exciting** tools that help make life easier and challenge the traditionalism in all of us so that we take control faster.

Dan reviews the **exact** process he uses each day to be an intentional leader and a **differentiator** in a one-size-fits-all world.

I help **LEADERS** remove distractions so they can live intentional, fulfilled, and meaningful lives.
